This reference guide provides an overview and the steps for completing the self-enrollment for Imprivata – Multi-factor Authentication for remote access. Users can complete their enrollment from a remote location and validate via Citrix website.

Overview

The **Imprivata** - **Multi-factor Authentication for Remote Access** is another solution being implemented to increase security, and safeguard healthcare information.

Users will have the ability to self-enroll their smart phones for multi-factor authentication. Once enrolled, the user will receive a soft token on their phone as a second authentication factor in addition to providing their network credentials when logging into the Harris Health network via external Citrix, external Peoplesoft and other external sites. Users with unsupported phones can enroll only the SMS code on their phones, and skip enrolling on the Imprivata app.

The steps below provide instructions on how to complete the enrollment process from a remote location.

Imprivata-Enrollment for Multi-factor Authentication from Remote ocation for Remote Access

 Enter your User Name and Password, select the I accept the Terms and Conditions checkbox and click Log On. 	Harris Health System is implementing Imprivata multi-factor authentication for Citrix external remote access (MFA). You will no longer be able to access Citrix starting JANUARY 15, 2019, if you do not enroll. For security purposes, enrollment must be completed on-site at a Harris Health workstation. You will need to download the Imprivata app on your mobile device prior to enrolling. This doesn't apply to Community Connect affiliates or CHC employees.
