

HHSC,

Good morning! I have started to receive quite a few questions on the IGT process. It is my understanding that it will go much like the DY1 IGT process did. That is, a request for a specific amount of IGT, based on August reporting achievement and approval, will be made approximately 5 days in advance of the IGT due date. In the meantime, providers may use their October reporting template to determine how much IGT will be required. Is this correct?

Thank you!

Hi Nicole,

Yes, the IGT process will be similar to DY1, with the exception of the IGT allocation confirmation form, which we notified the RHP's about several weeks ago. We will require every transferring entity to submit this form, even if they are only transferring for themselves. As far as the time frame, we plan to send out the IGT notification this Friday with a IGT Settlement date of 10/28/13. Here is the rest of the schedule:

10/28	DSRIP IGT Settlement date
10/29	DSRIP Sweeps date
11/18	DSRIP Payment date

Thank You,
