A contact designated as "Both" will be included in the RHP Plan, on the DSRIP Provider Distribution List, and will be given access to the DSRIP Online Reporting System.

#### Section 3: Optional Withdrawal From DSRIP

Do Not Withdraw fr

Please select an option below. By selecting "Yes - Withdraw from DSRIP," this organization acknowledges it understands that any DY6 DSRIP payments will be recouped as required by the DY6 Program Funding and Mechanics Protocol. This does not include recoupent of DY4-5 payments that may have occurred in DY6 due to allowable carryforward.

Section 4: Performing Provider Over	View Harris County Public Health & Environmental Services (HCPHES) is a comprehensive local health department serving the third most populous county in the United States. It spans over 1700 square miles, and its land area is larger than the state of Rhode Island. The HCPHES jurisdiction includes approximately 2 million people within Harris County's unincorporated areas and over 30 small municipalities located in Harris County (not including the city of Houston). For certain public health services such as vector/mosquito control, Ryan White/Tite I HIV funding, and refugee health screening, the HCPHES jurisdiction encompasses the entire county including the city of Houston, therefore providing services to over 4 million people in total. Since being chartered in 1942 by Harris County Commissioners Court, HCPHES has provided leadership in a wide range of public health activities and programming including but not limited to communicable disease control; veterinary and environmental public health, and clinical preventive services. These services include strong programming in immunizations, oral health, tuberculosis prevention & treatment, and nutrition/wellness through a variety of efforts including the HCPHES Women, Infants, & Children (WIC) program. Across this broad organizational framework, HCPHES has negged in significant departmental strategic planning activities, including the development and education, and assurance activities). These categories allow HCPHES to engage within a variety of public health sectors including the services provided through its clinical programs. The mission statement of HCPHES is "Promoting a Healthy and Safe Community, Preventing Illness and Injury, Protecting You, HCPHES, Your Department for Life" while its clear vision is "Healthy People, Healthy Communities a Healthy Harris County." The HCPHES staff (over 700) are public health professionalism, and Equity, With a current annual operating budget of \$100 million, HCPHES is organized into three offices that apply spe
Overall DSRIP Goals:	<ul> <li>Increase access to primary and specialty care services, with a focus on underserved populations, to ensure patients receive the most appropriate care for their condition, regardless of where they live or their ability to pay.</li> <li>Transform health care delivery from a disease-focused model of episodic care to a patient-centered, coordinated delivery model that improves patient satisfaction and health outcomes, reduces unnecessary or duplicative services, and builds on the accomplishments of our existing health care system</li> <li>Develop a culture of ongoing transformation and innovation that maximizes the use of technology and best-practices, facilitates regional collaboration and sharing, and engages patients, providers, and other stakeholders in the planning, implementation, and evaluation processes.</li> </ul>

Alignment with regional community needs assessment:	The HCPHES clinical care system has over 40 years of experience in providing quality, cost-effective preventive clinical services to the Harris County community. Thus, HCPHES has been considered a trusted leader in public health service provision in the community for several decades. HCPHES views its role similar to the Institute of Medicine definition of public health, " to assure the conditions in which people can be health," HCPHES focuses on population-based approaches to meeting the public health needs of the Harris County community. HCPHES- similar to other local health departments across the country- often thus serves as the "safety net" provider to many community members who may not have any other way of receiving needed health services. Safety net it suess are thus taken into consideration during HCPHES policy deliberations. As a safety net provider and local health department for the unincorporated areas of Harris County and for certain public health services such as vector/mosquite control, Ryan White/Title HIV funding, and refugee health screening, the HCPHES system encounters first hand core regional issues outlined in the most recent Regional Community Health NeedS Assessment. Insufficient Access to Care and Inadequate Transportation options have long been an issue facing residence in unincorporated areas of Harris County. Lack of access to Care and Inadequate Transportation options have long been an issue facing residence in unincorporated areas of Harris County. Lack of access to are motive, and specialty care services, with a focus on underserved populations, to ensure patients receive the most appropriate care for their condition, regardless of where they live or their ability to pay. HCPHES plans to continue to leverage the expanded reach of the mobile health clinic to provide prescreen eligibility, insurance enrollment assistance, direct service, educational and clinical outrecah activities to those residents withou timmediate acces to care. Additional HCPHES will continue t

## Local Health Departments - Optional Components

Optional System Component	Would you like to select this component?
Mobile Outreach	Yes

### Please enter a description of this System Component.

Waiver 1.0 made way for Harris County Public Health to break away from the fixed clinical establishment, and take essential wellness educations and screenings outside the fixed structure and into the community. The mobile outreach team is comprised of the following programs (Childhood Obesity Reduction, Tobacco Counseling, Mobile Health, Child school-based Dental Screenings, Lead poisoning education). HCPH made heavy investments in mobile outreach through the purchase of one medical speciality unit and one dental speciality unit. Both to allow for expansion of service offerings.

Optional System Component	Would you like to select this component?		
Other	No

Section 1: Measure Exemption Requests and Measure Setting System Components Comp Section 1: Measure Exemption Requests and Measure Setting System Components

In order to be eligible for payment for a measure's reporting milestone, the Performing Provider must report its performance on the all-payer, Medicaid-only, and LIU-only payer types. Performing Providers may request to be exempted from reporting a measure's performance on the Medicaid-only payer type or the LIU-only payer type with good cause, such as data limitations. Note that reporting a measure's all-payer performance is still required to be eligible for payment for a measure's reporting milestone.

Performing Provider Information

RHP:

TPI and Performing Provider Name: Performing Provider Type: Ownership: 158771901 - Harris County Public Health & Environmental Services Local Health Department (LHD) Non-State Owned Public

#### Section 1: Transition from DY2-6 Projects to DY7-8 Provider-Level Outcomes and Core Activities

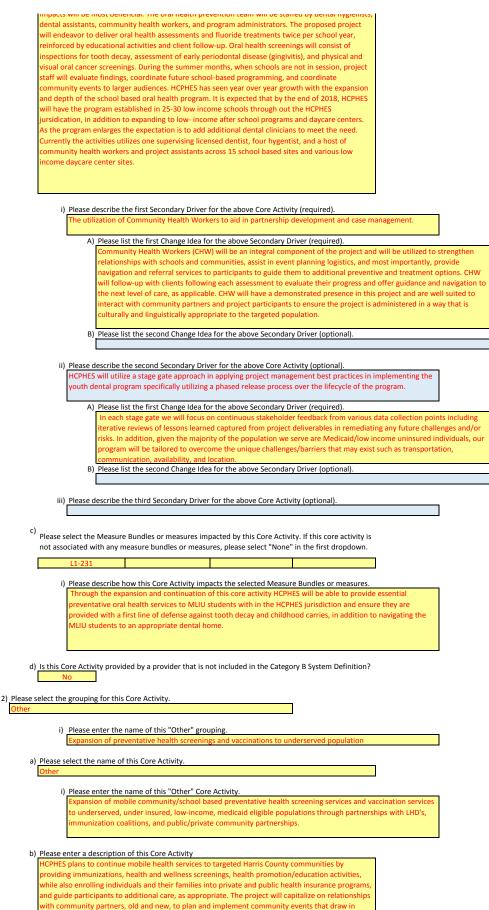

DY6 Project ID	Project Option	Project Summary	Completed/ Continuing	Enter a description for continuation (optional)
RHP 3_158771901.1.100	1.8.9	The proposed project will seek to improve the oral health of indigent school-aged children through collaborations with targeted schools, school districts, Head Start Centers, and communities within Harris County to provide preventive dental screenings and fluoride varnish applications, oral health education, and navigator- assisted referrals to community dental providers, including HCPHES dental services.	Continuing as Core Activity in DY7-8	
RHP 3_158771901.1.101	1.1.3	The proposed project will improve access to appropriate/affordable prevention screening and wellness visits for target populations through the provision of community-based mobile health services and will include immunizations, health screenings, health promotion/education, and other established HCPHES public health programming. The project will also feature a robust education/referral program to navigate participants, as appropriate, to additional services such as integrated care programs, primary care providers and treatment programs.	Continuing as Core Activity in DY7-8	
RHP 3_158771901.2.100	2.7.5	Harris County Public Health and Environmental Services (HCPHES) proposes to expand its operations and leverage mobile clinic units alongside existing fixed clinics to meet the health needs of low income, indigent and special needs populations, that lack the resources and/or physical mobility to commute to fixed site locations to receive the vital and preventative services necessary to combat and address childhood and adolescent obesity. This expansion will allow for increased accessibility to services, health education programs, and the dissemination of critical health education information to the target communities.	Continuing as Core Activity in DY7-8	
RHP 3_158771901.2.101	2.7.2	Harris County Public Health and Environmental Services (HCPHES) proposes to expand its operations and leverage mobile clinic units alongside existing fixed clinics to meet the health needs of low income, indigent and special needs populations, that lack the resources and/or physical mobility to commute to fixed site locations to receive the vital and preventative services necessary to reduce tobacco use. This expansion will allow for increased accessibility to services, health education programs, and the dissemination of critical health education information to the target communities.	Continuing as Core Activity in DY7-8	
RHP 3_158771901.2.102	2.7.1	The performing provider will improve adherence with treatment in the target population by implementing video-based directly observed therapy (VDOT) for qualified tuberculosis (TB) patients. The project will also offer a shortened therapy regimen to qualified patients being treated for latent TB infection (LTBI) by changing the course of medication prescribed. This project will thereby increase the number of patients who are adequately treated for active TB disease and TB infection and ultimately decrease potentially preventable hospitalizations for tuberculosis as well as costs for treating drug-resistant TB.	Continuing as Core Activity in DY7-8	

#### Section 2: Core Activities

#### Please enter your organization's number of Core Activities:

Please select the grouping for this Core Activity.
 Expansion or Enhancement of Oral Health Services
 a) Please select the name of this Core Activity.
 Expansion of school based sealant and/or fluoride varnish initiatives to otherwise unserved school-aged children by enhancing dental workforce capacity through partnerships with dental and dental hygiene schools, local health departments (LHDs), federally qualified health centers (FQHCs), and/or local dental providers.
 b) Please enter a description of this Core Activity
 HCPHES proposes to expand its current oral health outreach and treatment services in a focused of the durating and the d

effort to provide preventive dental screenings and fluoride varnishes, oral health education, and navigator-assisted referrals to community dental providers, including clinic-based HCPHES dental services. HCPHES staff will cultivate relationships with target schools, school districts, and community organizations to implement a school-based dental assessment and fluoride varnish program to deliver services directly to children where they attend school or congregate. The targeted population for this project is lower income individuals and the project will use the proportion of free and/or reduced lunch students as a proxy measure to identify where project impacts will be prost bacting in the provention to the project will be careford by dental hereinsit.

esidents that may not have access to basic health screenings and prevention. HCPHES has

expanded the clinical provider base with the addition of one full-time chronic disease physician, and one part time family nurse practitioner, supported by a knowledgeable clinical support staff (RN, LVN, MA, and registration specialist). IN the last demonstration year the mobile health team conducted over 140 unique screening and wellness events through out the HCPHES jurisdiction, in addition to maintaining immunization and screening activities in three community fixed sites and a refugee health program. With provisions and incentive payments captured through waiver 1.0 HCPHES has been able to purchase a two opertory medical coach to provide direct service in underserved communities to mitigate access to care issues caused by transportation and resource limitations.

i) Please describe the first Secondary Driver for the above Core Activity (required).
 Optimize the use and accessibility of mobile screening and vaccination clinics

A) Please list the first Change Idea for the above Secondary Driver (required). A significant proportion of Harris County residents are uninsured and many lack the resources or face geographic and logistical barriers in accessing primary health care and basic health screenings. The project seeks to intervene within the HCPHES jurisdiction by delivering high quality screenings, immunizations for eligible children and adults, and track referral services offered to communities and residents directly. HCPHES plans to continue to collect and capture data related to the number of unique community/ mobile events conducted each quarter, number of unique individual impacted, and school based immunization compliance rates within targeted MLIU schools.

B) Please list the second Change Idea for the above Secondary Driver (optional).

ii) Please describe the second Secondary Driver for the above Core Activity (optional).

c) Please select the Measure Bundles or measures impacted by this Core Activity. If this core activity is not associated with any measure bundles or measures, please select "None" in the first dropdown.

L1-269	3_158771901.3.203	L1-271	L1-272
L1-280	L1-343	L1-345	

i) Please describe how this Core Activity impacts the selected Measure Bundles or measures. This core activity impacts the measures seleted by removing the barriers to care identified in the most recent CHNA caused by transportation and resource deficits. This approach makes it easier for the target population to access wellness services, immunizations, STI/D screening services, preventative health education and navigation to essential resources.

d) Is this Core Activity provided by a provider that is not included in the Category B System Definition? No

revention and Wellness

a) Please select the name of this Core Activity. Implementation of evidence-based strategies to reduce and prevent obesity in children and adolescents (e.g., Technology Supported Multi Component Coaching or Counseling Interventions to Reduce Weight and Maintain Weight Loss; Coordinated Approach to Child Health - CATCH; and

#### b) Please enter a description of this Core Activity

HCPHES, through the utilization of mobile and fixed clinics, will increase access to the vital services necessary to reduce childhood and adolescent obesity rates in the target communities by providing screenings, health promotion education, and a robust referral program into applicable services such as integrated care programs, primary care providers and treatment programs, as applicable. HCPHES aims to reduce childhood and adolescent obesity, which has been identified by the American Heart Association, Centers for Disease Control and Prevention, American College of Cardiology, and the National Institutes of Health along with many other health and research agencies nationally and internationally, as an elevated risk factor associated with and causing cardiovascular disease and disorders, including but not limited to, coronary heart disease, heart failure, and sudden death. Participants will be recruited through current clinical services, community-based events, and other HCPHES community-based programs. Physical locations for the proposed evidence based program sessions will be identified that best meets the needs of the participants and their families. HCPHES proposes to partner with local agencies that may also offer physical space for this initiative.

i) Please describe the first Secondary Driver for the above Core Activity (required).

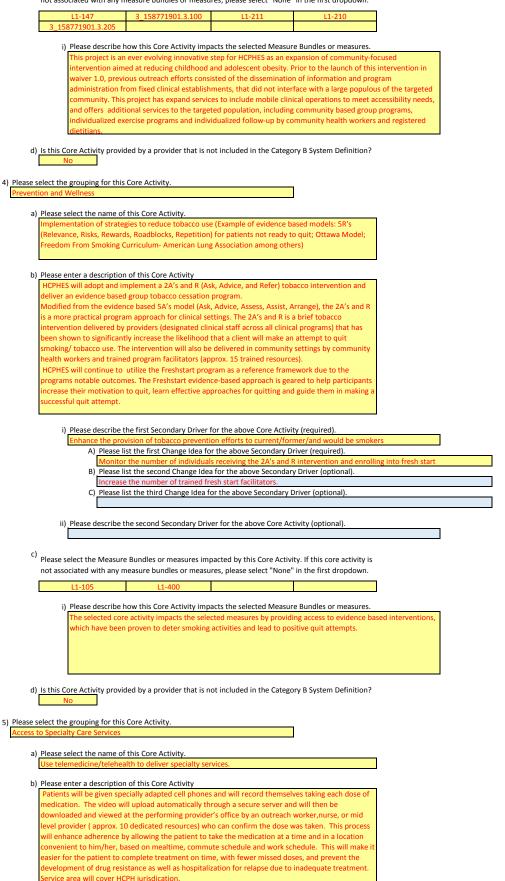

ptimize the use and enrollment of "at-risk" age appropriate children into the evidence based intervention

- A) Please list the first Change Idea for the above Secondary Driver (required). Increase the number of school based intervention sites within MLIU communities to increase enrollment and program completion.
- B) Please list the second Change Idea for the above Secondary Driver (optional).

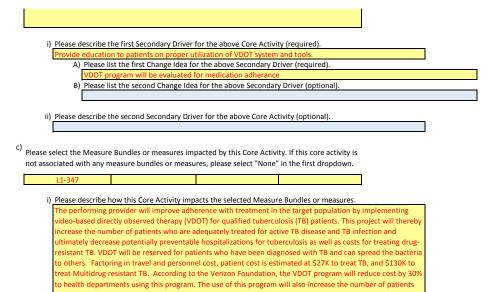

ii) Please describe the second Secondary Driver for the above Core Activity (optional).

<sup>3)</sup> Please select the grouping for this Core Activity

c) Please select the Measure Bundles or measures impacted by this Core Activity. If this core activity is not associated with any measure bundles or measures, please select "None" in the first dropdown.

5)

who stick with the proper medication treatment by nearly 50%.

d) Is this Core Activity provided by a provider that is not included in the Category B System Definition?
