VI. Strategic Discussion

A. Toward a Transformative Model of Care: ACS Platform Redesign

_Ambulatory Care Services Access and Operations Report – Specialty Care Access Report_

Dr. Glorimar Medina-Rivera presented the Ambulatory Care Services (ACS) Access and Operations Report. She stated that in recognizing the importance of early intervention, Harris Health and other safety net clinics have focused their efforts on the expansion of primary care services within Harris County. She mentioned that despite the increase of primary care entities across Harris County, Harris Health continues to treat for almost 50% of patients receiving primary care services. Dr. Medina stated that ACS’s goal is to implement the following three (3) strategies: 1) optimizing utilization of the current platform, 2) expanding the scope of primary care physicians (PCP), and 3) increasing the availability of community-based specialists. She explained that Harris Health plans to maximize the resources and tools currently available within the system to improve communication and clinical workflow, as well as improve the scheduling process. Dr. Medina stated that ACS specialists have developed management plans that are communicated to and carried out by the PCPs and that expanding the role of the PCP will include Point-of-Care testing to all the same day clinic sites. She also stated that ACS collaborated with Harris Health physician leadership to increase the availability of community-based specialty care providers within the health centers in areas with the greatest demand for specific specialty services. Dr. Medina reported that one of the main locations will be the Danny Jackson Health Center’s (Danny Jackson) which will house multiple clinical specialties and non-clinical social services. She stated that Danny Jackson has already implemented general surgery and urology services. Ms. Elena Marks stated that Harris Health needs the support of the community as it relates to these initiatives and that it is Harris Health’s responsibility to effectively convey the message to the public.

Dr. Monday stated that she would like to ensure that physicians are aware of the importance of the success of E-consults and telemedicine and that both the PCPs and specialists are collectively working together to reduce patient wait times.
Mr. Masi stated that this will be an ongoing dialogue as he has been invited to a briefing at Commissioners Court in mid-April to discuss Harris Health’s position regarding the development of a tertiary level care infrastructure. Discussion ensued. A copy of the presentation is available in the permanent record.

He noted that a new funding arrangement, Local Provider Participation Fund (LPPF), will likely be necessary in Harris County. Mr. Hiller reported that State Representative Garnet Coleman filed House Bill 3459 and Senator Borris L. Miles filed Senate Bill 2022, which address future funding arrangements.
