Fetal death rates per 1000 live births plus fetal deaths in Harris County 2007 to 2011 combined data. The Healthy People 2020 goal is 5.6 deaths /1000 births & fetal deaths. Category numbers 0 to 0.5 are too low to calculate fetal mortality rate (FMR) and are considered unstable. The 2006 U.S. FMR was 6.05. Location of mother's zip code is used for birth numbers, infant location used for death numbers.
