

Common prescription medicines that may interact with your warfarin include:

- Amiodarone
- Antibiotics*
- Clarithromycin or erythromycin
- Metronidazole
- Trimethoprim/Sulfamethoxazole (Bactrim®)
- Rifampin
- Clopidogrel (Plavix®)
- Fibrates (gemfibrozil or fenofibrate)
- Fluconazole
- Isoniazid
- Levothyroxine and methimazole
- NSAIDs (ibuprofen, naproxen)
- Simvastatin and simvastatin/ezetimibe (Vytorin®)

Contact your physician and/or Anticoagulation provider if you are prescribed any of the above medications.

*All antibiotics have the potential to interact with warfarin
