

KNOW BEFORE YOU GO

Your guide for where to go when you need medical care.

Emergency room (ER): For immediate treatment of critical injuries or illness. Open 24/7. If a situation seems life-threatening, call 911 or go to the nearest emergency room.

"Freestanding" emergency room (ER) locations are becoming more common in many areas. Because these ERs are not inside hospitals, they may look like urgent care centers. When you receive care at an ER, you're billed at a much higher cost than at other health care facilities.
