Subject: Harris Health System Research Fee Schedule 2022/2023

The fee schedule for Harris Health System services provided for research protocols has been updated and is attached. These fees are effective for financial agreements created after **November 1, 2022**.

The column headings are defined as follows:

- “Government Discount Rate” is a discounted rate that will be used for research studies funded by the Federal Government that pay Facilities & Administrative (F&A) Rates (also known as indirect cost rates) in addition to fee for service.
- “Commercial Discount Rate” is a discounted rate that will be used for research studies funded by sponsoring agencies that pay F&A Rates in addition to fee for service.
- “Standard Non-Discount Rate” is a rate that will be used for research studies paying only fee for service.

All direct and indirect (facilities & administrative) costs incurred as a result of human subjects research conducted at Harris Health System facilities are due and payable to Harris Health and are the Principal Investigator’s (PI) responsibility to pay. PI’s with delinquent accounts may be subject to sanctions, including suspension or loss of research privileges at Harris Health and to the immediate termination of any protocol(s) in question.

These fees are effective for new financial agreements only. Current financial agreements will be honored for the life of the protocol. Researchers are encouraged to request an initial financial review of a proposed protocol during the preparation of the protocol budget. Harris Health will honor fees quoted during the financial review when the final financial agreement is negotiated.

Any request for services that are not on this fee schedule will be priced at the then-current Harris Health rate. Please contact Sara Ruppelt at sara.ruppelt@harrishealth.org with any questions. Thank you.

HARRIS HEALTH SYSTEM
INVESTIGATIONAL DRUG SERVICES (IDS)

The following schedule outlines the services available to implement and support a study through the IDS. The services available and charges for those services will apply to research protocols conducted within Harris Health System. Certain research protocols may require services not listed or be of such complex nature that the schedule below may not sufficiently address the costs. In those instances, the IDS will develop an individual budget based on the specific requirements of the study.

IDS Pharmacy Fee Schedule for Research Protocols
